

The Bright Ideas Collection Presents...

Hundreds Chart *and* **Mental Math Activities**

Over 250
Math Prompts
for K-6 Students!

Have students make their own “*Palm Pockets*”
to answer questions in

**Addition • Subtraction • Multiplication
Division • Money • Time • Fractions
Decimals • Place Value • and More!**

All students are involved!
All students are participating without hesitation!
All students are learning together!

By Kris Thurgood and Kim Christopherson

www.ILoveThatTeachingIdea.com

How to Use This Book...

How many times as a teacher do you call out a problem such as, “What is 5 times 3?” only to have a few students shouting out an answer. One student may respond, “15!” and then an echo of “followers” chant, “15!” Another student might shout out, “uh...23!” and yes, again, you’ll have the “followers” repeat “23!” Meanwhile you’ve got 10 other students staring out the window, playing in a desk, or just too embarrassed to say anything at all!

We wanted a system where students were all thinking for themselves, participating and sharing. A system where students weren’t afraid of giving an answer for fear it may be wrong. And one, of course, that we as teachers could quickly and immediately see who “got it” and who still needed help. This is why we created a simple system we call, “*The Palm Pocket.*” It is a SIMPLE, yet EFFECTIVE math technique that teachers are excited about! Here is what you’ll need to do:

- ✓ Each student needs 1 piece of 8 ½ x 11 construction paper.
- ✓ Fold your paper down in half. (See Fig. A)
- ✓ Turn the bottom, opened edge, upward about 1 inch, and fold on each side. (See Fig. B)
- ✓ Staple along the side edges, but keep the bottom open. This creates a “pocket” for the number cards to tuck in, and allows a student to fit his/her hand inside. (See Fig. C)

Each student will also have their own set of number or symbol cards found on pages 3 and 4, as well as a “hundreds chart.” Not all math activities will use the hundreds chart, but it can be used as the teacher sees fit.

The easiest way we’ve found to use these number or symbol cards is to simply cut each one separately, punch a hole in the corner, and bind them with a metal ring. This way, we always had the cards on hand when we had a few minutes before lunch, at the beginning of math time, or even the last few minutes of the school day. Problems are divided into math concepts and begin with the easiest questions, and then progress to more difficult questions. This allows you to find what questions best suit the needs of **your** class.

Students take out their “palm pockets” and their number/symbol cards and answer your questions in unison. The cue, “*on your mark*” signals to the students that you are about to give them a problem. When you say, “*get set*” students should then be putting their answers inside of the flap. They simply tuck their answers inside the 1 inch flap and then “*SHOW*” you their answer!

Best of luck! If you have any questions, just contact us at our website, www.ILoveThatTeachingIdea.com .

I LOVE THAT TEACHING IDEA!

I Love That Teaching Idea! was founded in 1998 by twin sisters Kim Christopherson and Kris Thurgood. Our goal is to provide elementary school teachers creative, practical and effective ideas for teachers in the classroom.

Our new line of books, “The Bright Ideas Collection,” is a series designed to provide unique, ready-to-implement ideas for the busy educator. You can currently find these titles in the collection:

- ***The Edible Car Race!*** - Simple Machines Culminating Activity
- ***The Creative Burst!*** (K-6) – Creative Writing Projects
- ***The Basic Fact Birthday Bash!*** (K-2) – Addition/Subtraction
- ***A Mini-Book of Mini-Lessons!*** (K-2) & (3-6)
- 25 Writing Lessons
- ***Doodlebug Readers*** – Emergent Readers will read, write and illustrate their own books! 2 volumes
- ***Surviving Your 1st Year of Teaching (or ANY YEAR!) and Loving It!***
Whether this is your first year, or your 25th year of teaching, you’ll love the practical and effective ideas and reproducibles in this book! Areas covered include classroom management, parent involvement, organization and assessment! You won’t want to miss out on the popular “Chip Trophy,” “Silver Sneaker” ready-to-implement assessment forms, and more.

...AND MORE!! We are continuing to add more titles, so check back often for more details!
